

First-Order Partial Differential Equations > Linear Equations > Section 1.1

4.
$$f(x)\frac{\partial w}{\partial x} + g(y)\frac{\partial w}{\partial y} = 0$$
.

1°. Principal integral:
$$\Xi = \int \frac{dx}{f(x)} - \int \frac{dy}{g(y)}$$
.

 2° . General solution: $w = \Phi(\Xi)$, where $\Phi(\Xi)$ is an arbitrary function.
